

# Flora of Nova Scotia Field Course

**BIOL 3293**

3 Credit Hours

June 1<sup>st</sup> – June 19, 2020

**Learn about the plant world that surrounds you** by identifying species using technical keys, gaining knowledge about our region's most prominent plant families, getting to know our most common species, exploring and reporting on a variety of the region's habitat types, and collecting plant specimens.

Because **plants are almost everywhere you look**, this course should prove useful for students interested in studying or working in the fields of Biology, Ecology, Botany, Environmental Studies and Sciences, Environmental Assessments, Species At Risk, etc.

Includes **lectures and fieldwork**. Prerequisite(s): BIOL 1113/BIOL 1123 with a minimum grade of C-, or permission of the Department.
